ORDER GUIDE

CRYSTAL FILTERS IN DIP TYPE

HOW TO ORDER

When inquiring or ordering TGS Crystal Filters, please mention part number and package type to assure correct specification and prompt delivery services.

For special using conditions, more detailed specifications should be offered, if more practical applications, etc., are specified, the most suitable products can be introduced.

When passband width at 3dB, etc., are unclear for crystal filters, the result will be more advantageous if the circuit being adopted or the actual device is shown to us. There can be manufacturing limits for some types, frequencies, temperature characteristics, operating conditions, and so on.
